Comsat Trail-Head and Parking Lot Situation

In light of the new ownership of the Earth Station, we would like to remind folks that it is more than a managed parking lot situation. A heavily-used trail Right-Of-Way goes through the present parking lot. While the new owners want to protect their properties, we would like assurance that the trail/ROW will not be blocked. It is the sole access point for private lands to the East. It is used year round by hikers, 4-wheelers, skiers, dog mushers, and snow-machiners.
